SUMMARY

Results-oriented Software Engineering student equipped with strong fundamentals in object-oriented programming, full-stack web development, and hardware automation. Fast-learning developers prepared to excel in remote entry-level environments by delivering clean code and collaborating seamlessly across distributed teams.

TECHNICAL & PROFESSIONAL SKILLS

- **Core Languages:** C++, OOP Frameworks, Basic Hardware Firmware
 - **Web Systems:** Frontend & Backend Architecture, Database Logic
 - **Hardware & Tools:** Arduino Boards, Microcontrollers, MS Office
- **Remote Ops:** Asynchronous Workflows, Git Basics, Virtual Collaboration
 - **Problem Solving:** Debugging Codebases, Structural Logic Optimization
 - **Communication:** Fluent in English, Urdu, and Sindhi

KEY TECHNICAL PROJECTS

Essentia Bella – Beauty & Cosmetics Website

- Developed a modern beauty and cosmetics website with premium branding.
- Implemented PHP backend and SQL database integration.
- Built optimized contact forms and seamless navigation.
- Applied modern frontend design principles.

Sky Journey – Travel & Tourism Booking Platform

- Designed and developed a travel booking website with destination listings and tour packages.
- Built responsive booking interfaces with PHP backend.
- Integrated SQL database for packages and customer inquiries.
- Live Demo: <https://skyjourney.freehosting.dev/?i=1>

E-Commerce Website — Elvano (PHP + MySQL)

- Designed and constructed a functional online shopping storefront with item cataloging
- Built backend logic using PHP and MySQL with PKR pricing and admin panel
- Handled full codebase rebranding, SVG logo creation, and product image processing

Basic Arduino Projects (C++ / Embedded Lab Experiments)

- Built simple microcontroller hardware setups using C++ scripts in the Arduino IDE
- Mapped core terminal configurations to interpret live sensory modules

Accounting Management System

- Developed a business trading and accounting management application using Java and JSP.
- Implemented modules for accounting, ledger management, vouchers, and report generation.
- Built a scalable Maven-based project structure and deployed the application on Apache Tomcat.

Offshore – Marine & Offshore Business Website

- Developed a complete business website for an offshore services company with a modern responsive interface.
- Built dynamic PHP pages with SQL database integration.
- Optimized performance, accessibility and cross-browser compatibility.
- Demonstrated end-to-end full-stack development.

Student Management System (Java — OOP Project)

- Built a terminal-based Student Management System using Java and Apache NetBeans
- Applied OOP concepts: Inheritance (Person → Student), Encapsulation, Classes & Objects
- Implemented Switch, Do-While loop, Arrays, and null-safety checks
- Live on GitHub: <https://github.com/Parasraj35/Student-Management-System/projects>

EDUCATION & CREDENTIALS

- BS in Software Engineering (Final Year)** — ZBASIT, Hyderabad (2023 – Present)
- Diploma in Information Technology (CIT)** — Government College of Technology (Boys), Hyderabad (2021 – 2023)
- Intermediate in Pre-Engineering (Grade A - 77%)** BISE, Hyderabad (Passed: 2022)
- Matriculation in Computer Science (Grade A - 76%)** BISE, Hyderabad (Passed: 2019)

PERSONAL FRAMEWORK

Languages: English, Urdu, Sindhi (Full Professional Proficiency) | **Nationality:** Pakistani

CERTIFICATIONS

- **AIG** — Shields Up: Cybersecurity Job Simulation | Forage | *June 2026*
- **Deloitte** — Data Analytics Job Simulation | Forage | *July 2026*
- **AWS** — Foundations of Prompt Engineering | Amazon Web Services | *July 2026*
- **IBM Cognitive Class** — SQL and Relational Databases | *July 2026*

ADDITIONAL CERTIFICATIONS

Forage — Software Development Job Simulation | *June 2026*
